I am an objective and highly motivated Fullstack Developer and Software Engineer with 4+ years of experience. I approach complex technical challenges with a logical mindset and strong communication skills. Driven by a deep willingness to learn and advance my expertise, I focus on delivering professional, high-quality solutions that drive real value for the teams and companies I work with.

EXPERIENCE

Software Engineer

February 2026 - June 2026

Taiwan Mobile ·

Develop an E-Commerce Backend. Building POC for further development idea. Direct meeting with client and internal client project manager. Create an ERD for every new concept apps.

Software Engineering · E-Commerce Backend · Proof of Concept (POC) · Client Communication · Project Management · Entity-Relationship Diagram (ERD) · Backend Development

Fullstack Developer

December 2024 — August 2025

PT. Benings Indonesia Group · Indonesia · On-site

Developed and maintained an integrated digital ecosystem to support the company's e-commerce and warehouse operations. Built and enhanced the Skinmology e-commerce platform, Warehouse Management System (WMS), and Content Management System (CMS). Developed customer relationship management (CRM) applications for each user to streamline order tracking and management. Also engineered a desktop-based warehouse application using Electron.js, enabling real-time order synchronization and updates from multiple external sales platforms to improve operational efficiency and inventory coordination.

Full-Stack Development · E-Commerce Development · Warehouse Management System · CRM Development · CMS Development · Electron.js · Desktop Application · Real-Time Synchronization · API Integration · Order Management · Inventory Management · Third-Party Integration

Fullstack Developer

April 2024 — November 2024

PT. Waleta Asia Jaya · Salatiga, Central Java · On-site

Led the redevelopment of the company's internal digital ecosystem, building full-stack applications covering Applicant Tracking Systems (ATS), attendance management, payroll, supplier and buyer portals, and internal staff applications. Migrated legacy PHP applications to Node.js to improve maintainability, scalability, and system performance. Also designed intuitive UI/UX interfaces and prototypes for various business applications, ensuring seamless user experiences and efficient workflows across departments.

Full-Stack Development · Node.js · PHP Migration · Backend Development · Frontend Development · REST API · ATS Development · HR Management System · Attendance System · Payroll System · UI/UX Design · Prototyping · Business Process Automation

Fullstack Developer October 2022 — February 2024

Mediatropy Digital Agency · Singapore North Bridge · Hybrid

Developed and maintained full-stack web applications for clients across various business needs, translating requirements into functional and scalable digital solutions. Collaborated directly with clients through regular update meetings, gathered project requirements, communicated development progress, and built customized Content Management Systems (CMS) to streamline content management and business operations.

Full-Stack Development · Web Application Development · Frontend Development · Backend Development · CMS Development · Client Communication · Requirements Analysis · Project Management · Problem Solving

Production Operator Leader Januari 2022 — Mei 2022

Honda Prospect Motor - NDC (New Delivery Center) · Karawang · On-site

Led and coordinated production line operations in an automotive manufacturing environment, ensuring production targets, product quality, and operational efficiency were consistently achieved. Monitored workflow performance, coordinated team activities, identified production issues, and implemented improvements to maintain smooth manufacturing processes while upholding workplace safety and quality standards.

Electrical Engineering · Android AUTO · Prototyping · Car Manufacturing · Production Line · Production Management

Electrical Maintenance July 2021 — December 2021

PT Perusahaan Industri Ceres · Bandung · On-site

Performed electrical maintenance and troubleshooting of industrial equipment and control systems, ensuring operational reliability and minimizing production downtime. Worked with PLCs, smart relays, electrical control panels, and industrial automation systems while maintaining electrical safety standards and supporting efficient manufacturing operations.
